

Charges to Research Committee 2024-25

- Review the process for charters of Centers and Institutes, including how that correlates with use of the term “center” to get a larger grant, to what extent we continue to use “thematic initiatives” when these should be chartered as centers/institutes, and whether the university is up to date in reviewing and renewing charters
- In conjunction with OVPR’s review of F&A costs, consider this issue in a joint meeting of Research and Budget, with recommendations to Policy
- Work with the appropriate offices to improve timing/develop fast track processes for IACUC grant proposal pilot studies and IRB low-risk (exempt/expedited) studies
